March 15, 2010

Mr. Michael P. Lynch
Manager
East Bradford Township
666 Copeland School Rd.
West Chester, PA 19380

Dear Michael,

As part of our continuing infrastructure improvement program, Aqua Pennsylvania Inc. (Aqua) will be installing a water main in the following location:

- Downingtown Pike between Frank Road and West Chester By-Pass
- Highland Road between Downingtown Pike and the creek.

The \$1,090,246 project is scheduled to begin on March 15, 2010 when crews will begin to install 6,731 feet of 24-inch ductile iron water main and install 8 new fire hydrants. We estimate that the main installation part of the project including individual service connections (when applied for), fire hydrant installations, side street tie-ins and street restoration will be completed in June, 2010.

Crews will work weekdays between 9:00 am and 3:00 pm daily. There may be some minor traffic disruptions during this construction project but flagman will be on site and all necessary vehicles will be given priority.

Should an emergency shutdown occur, service will be restored as soon as possible. The new main installation will increase service reliability and water flow in the area, including that used for fire fighting.

Brubacher Excavating Company, Inc. will be Aqua's construction contractor for this project. If you have any questions or concerns during the project, please contact our Aqua's Superintendent of Construction Nick D'Antonio at 610.430.0747 ext. 55000. Should you have an emergency, please contact Customer Service Department during business hours or our emergency dispatcher after hours, both of which can be reached at 877.987.2782.

Sincerely,

Mark Heavener
Aqua Pennsylvania
