

Attention East Bradford Township Residents

If you or someone you know would need special evacuation assistance or attention in the event of a major emergency or long term power failure within the township please take a moment to email the township Emergency Management Coordinator. Examples would include those who are oxygen dependent, bed ridden, have severe medical conditions, are unable to walk, and or require electricity for medical reasons.

That person's information including name, address, telephone number, and reason for assistance will be included into the township's Emergency Operations Plan and will be kept on file at the Chester County 911 Center. These names are kept confidential and are only available to those responding to or during an emergency.

All township nursing homes and group homes are already included in the Emergency Plan.
