NO. STREET

CHECKLIST for SUBMITTAL of PERMIT APPLICATION for SWIMMING POOLS, GARAGES, ADDITIONS

The following documents must be submitted with the permit application (other items may be required):

- 1 completed application form (be sure to sign under Section IV)
- 3 copies of the plot plan (not needed for basement refinishing & interior alterations)
- 2 copies of the building plans
- 1 copy of the zoning compliance sheet
- 1 signed copy of the inspection instructions
- 1 copy of the workers compensation insurance information:
 - Section A must be completed. Section B or C must be completed.
 - Section B requires certificate of workers compensation.
 - Certificate of workers compensation should be attached with the application. If the certificate is faxed later, the application will be delayed until the fax is received.
 - Section C requires notarization.

- 1 copy of the contractor sheet

IMPORTANT NOTE CONCERNING DECK PERMITS: Deck permits may require approval letter from Homeowners' Association.

IMPORTANT NOTE CONCERNING ELECTRICAL INSPECTIONS: In accordance with the latest edition of the National Electrical Code, effective immediately, all current and future construction activities shall require the following electrical inspections by a recognized independent inspection agency:

- Electrical service inspections
- Rough wire inspections
- Final electrical inspections
- HVAC electrical connection inspections
- Underground electrical inspections

All approvals are subject to review by the Township. Municipal duplicate cards for each of the above are to be forwarded to the Township upon approval thereof.

Brenden L. Beaumont
East Bradford Township Code Enforcement Officer

EAST BRADFORD TOWNSHIP DIRECTIONS FOR BUILDING PERMIT APPLICATIONS

PLEASE READ ALL DIRECTIONS

Each applicant must submit the following completed documents prior to issuance of a building permit:

- I. Two copies of the Soil Erosion, Sedimentation & Grading Control Permit application with accompanying plans for approval. The Zoning Compliance Report must accompany this permit application.
- II. One copy of the sewage permit and/or well permit, if applicable.
- III. Two copies of the plot plan to scale, which is practical and legible, showing:
 - A. Owner's name and address
 - B. Date
 - C. Lot size
 - D. Metes and bounds (property description)
 - E. Direction of north
 - F. Right-of-way lines and dimensions
 - G. Easement lines and dimensions
 - H. Set-back lines
 - I. Contour lines for sloping lots or spot elevations for level lots. For steeply sloping lots or lots with unusual topographic conditions, the engineer or codes enforcement officer may require a complete grading plan.
 - J. Physical features, such as catch basins, utility structures, rock outcroppings, streams, existing buildings, parking areas, and driveways
 - K. Location of sanitary sewerage facilities and well. Copies of sewerage and well permits must be included, if applicable.
 - L. Location of structure (exact footprint) for which this permit is required
 - M. Location of driveways, marked "new" or "existing"
 - N. Provisions for erosion and sedimentation control and stormwater management
 - O. Zoning Data- three columns, "Permitted", "Existing", "Proposed",

**Example:
R-1 District**

<u>Permitted</u>	<u>Existing</u>	<u>Proposed</u>
<p>Gross Lot Size: three acres, minimum Net lot area: one acre minimum Lot Width at Building Line: 200 feet minimum Lot Width at Street Line: 50 feet minimum Lot Width at Street Line: 50 feet minimum Lot Coverage: 15% maximum Building Coverage: 10% maximum Building Setback Line: 75 feet minimum Side Yards: 30 feet minimum with not less than 70 feet total for both yards Rear Yard: 50 feet minimum Building and accessory building or structure height: Three stories above grade plane or 35 feet maximum</p>		

- IV. Two copies of building plans showing the below listed items. Plans must be presented in a form generally accepted by construction industry standards. Plans to be properly oriented. Reverse will not be accepted. Single line drawings are not acceptable. Basement drawings shall include all information except exterior elevations.

- A. Floor plans, foundation and each floor plan @ 1/4" per foot (all dimensions to be expressed in feet) – 2 copies showing materials and dimensions.
1. Foundation walls, footings, chimneys, fireplaces, plumbing fixtures, heating equipment, required ventilating equipment, foundation drains.
 2. Exterior walls, interior partitions, stairs, window and door sizes and locations, rooms and their intended use.
 3. Structural elements, including size, materials and direction or location of beams, girders, columns, lintels, joists, rafters, studding, furring, any required finishes and bracing.
 4. If pre-engineered systems are to be used (e.g. pre-engineered joists, trusses, etc.), layout plans and shop drawings are to be submitted with sign off from design architect.
- B. .Notes: place the following notes on all residential first floor plans:
1. No vertical wires, plastic or plastic foam in return air spaces.
 2. Air conditioning condensing units shall be placed on solid concrete lintels on 3" bed of tamped crushed stone or as directed by manufacturer (3" from grade to equipment).
 3. Draftstops and firestopping at soffits and drop ceilings. Line bottoms of joists with 1/2" plywood or gypsum board and face of studs with 3/4" plywood or 2" nominal lumber prior to building box.
 4. Foundation drain required around perimeter of basement, a 4" diameter perforated pipe, laid in crushed stone, below floor level, inside or outside of foundation and led to sump pit or grade.
 5. Egress window, each bedroom.
 6. No burial pits or burying permitted. No burning permitted. Remove all debris to a legal dumpsite.
- C. Two copies of the elevations (four exterior views) showing: Finished grades, depth of foundations and footings, floor-to-floor heights, roof slopes height from grade to peak, windows, door, projections, overhangs, and exterior materials.
- D. Two copies of typical wall sections showing: Materials and thickness of footings, foundation wall, sill plates, anchorage, framing, furring, sheathing, insulation, parging, damp proofing, roofing, depth of foundation, floor-to-floor heights, and final grade.
- E. All plan options shall be declared prior to building permit application submission.
- F. **If electrical work is proposed the applicant shall submit two copies of the electrical plans with an original approval signature by a third party Certified Electrical Plans Examiner.**
- V. Buildings other than single-family dwelling may require additional information.
- VI. Special structures or unusual conditions may require additional information.

FAILURE TO PROVIDE ALL INFORMATION AS REQUIRED ABOVE WILL BE CAUSE FOR DENIAL OF PERMIT.

**East Bradford Township
Cash Escrow Agreement for Site Plan Review**

THIS AGREEMENT, made this _____ day of _____, _____, by and between TOWNSHIP OF EAST BRADFORD, Chester County, Pennsylvania, (Township), and _____ of _____ (Property Owner and hereinafter referred to as Owner).

WITNESSETH:

WHEREAS, Owner contemplates improvements to real estate situate in the Township of East Bradford and simultaneously herewith is submitting building, erosion and sedimentation, stormwater, or other plans for review thereof and subsequent construction inspection thereof; and

WHEREAS, the consideration of said plans and improvements will require the expertise of professional personnel of said Township including, but not limited to, the Township Engineer, Township Solicitor, and Township consultants in connection with the consideration of such said plan and construction; and

WHEREAS, Owner hereby agrees to provide as security for completion of said review consideration by Township and construction inspection an escrow account for the use and benefit of Township to guarantee performance of the Owner of payment for said services as are required and reasonable.

NOW, THEREFORE, in consideration of Township relying upon the terms of the Escrow Agreement as security, and intending to be legally bound:

1. Owner hereby authorizes and directs the Township to review Owner site plans and related documents and to prepare a report of same for Township as may be required in order to access and process, without delay, the consideration of the building, erosion and sedimentation, stormwater, or other plans submitted by Owner. Said review and all services performed relative thereto shall be carried out in accordance with good engineering and legal practices and Rules and Regulations of Township.
2. Owner agrees that charges and fees for review and preparation of said plans by the Township Engineer, Township Solicitor and necessary Township land planning and related consultants, together with legal fees and administrative costs and expenses which Township may incur in connection therewith, including construction inspections, shall be paid from said fund upon demand.
3. Owner hereby deposits with Township in escrow the sum of one thousand (\$1,000.00) dollars as security for the payment of all costs and expenses, charges and fees, as set forth in paragraph 2 hereof which may be incurred by Township hereunder.
4. The Township will not commence processing the application until said security deposit has been made with Township. Failure by the Owner to maintain the escrow as agreed herein may cause delays and / or stoppage of application processing and said reviews by Township (Ref: Board of Supervisors November 11, 1980 Resolution).
5. The amount of five hundred (\$ 500.00) dollars shall be the minimum amount on deposit with Township at all times in order to pay for the aforementioned services.

When the amount held in escrow is at or below said minimum amount, Owner shall deposit an additional sum in the amount of five hundred (\$ 500.00) dollars to insure that all fees and costs incurred be paid.

6. When requested, Township shall submit to Owner a detailed itemization of expenses to be charged against said fund and shall make withdrawals there from accordingly.
7. The creation of the escrow herein provided for shall in no way represent, guarantee or require Township to approve the proposed development plan of Owner either as originally submitted or as thereafter revised, amended or modified.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed the day and year aforesaid.

Michael P. Lynch,
Township Manager/Treasurer

WITNESS:

OWNER:

For Owner

BY: _____ (SEAL)
Owner

**East Bradford Township
Chester County, Pennsylvania
Individual On-Lot Stormwater Management Facilities
Maintenance Agreement**

THIS MAINTENANCE AGREEMENT ("Maintenance Agreement") is executed the ____ day of _____ 20__, by and between _____ ("Owner") and EAST BRADFORD TOWNSHIP ("Township").

BACKGROUND

A. The Owner is the owner of a certain tract of ground located in East Bradford Township, Chester County, Pennsylvania (the "Property") on which it intends to develop _____ (the "Development") in accordance with a plan known as _____ prepared for the Owner by _____, dated _____ and last revised _____ (the " Plan"). The Plan is attached to this agreement and marked "Exhibit A".

B. The Plan depicts the construction of certain buildings and improvements, including the installation of certain storm water management facilities, including but not limited to components to control the quantity and quality of storm water discharge all as depicted on Sheet(s) _____ of the Plan. Specifically, the lot contains one storm water basin designed to regulate the rate of stormwater runoff discharged from the property. Stormwater management basin systems such as these must have routine inspection and maintenance during the life of the system and replacement of the system at the end of the lifespan of the system. The principal maintenance objective is to prevent clogging of the system, which may lead to advanced system failure. The Owner is required to and intends to install and maintain the storm water management facilities in accordance with the Plan and the conditions of approval adopted by the Township Board of Supervisors.

C. Section 94-311.A of the Code of the Township of East Bradford requires the Owner, by reference to the storm water ordinance requirements of the Township Municipal Separate Storm Sewer System (MS-4) permit with the Pennsylvania Department of Environmental Protection (PADEP), to enter into a maintenance agreement requiring that the Owners of storm water management facilities be responsible for proper maintenance during and after development of all required storm water management facilities required by the Plan.

D. Owner desires to execute and record this Maintenance Agreement in order to satisfy its obligations under Section 94-311.A referred to above.

GRANTS AND TERMS

NOW, THEREFORE, the Owner, for itself, its successors-in-interest, successors-in-title, grantees and assigns, for good and valuable consideration, the receipt and sufficiency whereof being hereby acknowledged, and intending to be legally bound hereby, hereby covenants, declares, agrees, confirms and provides as follows:

1) Incorporation of Background. Background Paragraphs A through D herein above are incorporated as part of the terms of this Maintenance Agreement.

a) Maintenance and Replacement. Owner shall continuously and perpetually maintain and/or replace the storm water management facilities in accordance with the conditions of approval, the Plan, and with manufacturers specifications. Routine maintenance shall be performed after a major rainfall event of 4 inches of rainfall or more in a 24 hour period (as reported by the local weather reports for the southeastern Pennsylvania region) as follows:

(i) Inlet drains, gutters and downspouts shall be kept clear of accumulated debris such as leaves, grass clippings, sticks and trash. Roof runoff exiting the downspout emergency tee is a potential indicator that there is a clog in the system.

(ii) Inspect all outlet devices that are located within the basin to ensure they are free and clear of debris and are structurally intact. If debris exists, it must be cleared immediately. If the structural failures or leaks exist, the homeowner shall contact the Township immediately to report the problem, receive initial instructions on the type of personnel to contact to correct the problem and schedule an inspection for the necessary repair work.

(iii) The basin impoundment device (earthen berm or retaining wall) must be inspected for structural integrity, leaks and proper stabilization (adequate vegetation in the case of an earthen berm). If the structural failures or leaks exist, the homeowner shall contact the Township immediately to report the problem, receive initial instructions on the type of personnel to contact to correct the problem and schedule an inspection for the necessary repair work.

(iv) The basin impoundment area must inspected for debris, accumulated sediments and inadequate vegetation/erosion. All sediments and debris must be removed promptly and the impoundment area must be maintained in a stable condition (adequate vegetation).

(v) Inspect all inlets that are located within the seepage bed. These inlets serve as observation units. Look for standing water at the bottom of the inlets. Check the inlets daily until standing water is not observed. The standing water should drain down in less than three days. If drain down does not occur the bed may be clogged and require excavation and cleaning. The homeowner shall contact the Township immediately to report the problem, receive initial instructions on the type of personnel to contact to correct the problem and schedule an inspection for the necessary repair work.

b) At least once annually, Owner shall perform a complete inspection that shall be reported to the Township. Annual inspection shall be performed after a major rainfall event of 4 inches or more in a 24 hour period (as described above) and shall include at a minimum, monitoring of the impoundment area to confirm that the system is draining down in less than three days. The recorded time and corresponding total rainfall amount shall be documented using the attached report form.

c) Owner shall submit the attached annual report form to the Township containing a description of the inspections and maintenance activities performed during the previous calendar year. If the system malfunctioned during the previous year, the report shall include photographic evidence of the malfunction and subsequent repair. The report shall be submitted to the Township not later than February 1st of the following year.

d) All materials collected by the storm water management facilities, including but not limited to oil and sediment, shall be disposed of in accordance with PADEP, EPA and any other applicable regulations. The annual report shall include a list of all materials disposed and certification of regulatory compliance with disposal requirements.

e) Should a storm water management facility not function properly, the Township shall be notified in writing within 10 days of the discovery of the malfunction and the proposed maintenance, repairs or modifications necessary to resolve the malfunction. All maintenance,

repairs or modifications shall be made in accordance with the specifications of the manufacturer or designer of the device. If a repair or modification is made not within manufacturer or designer's specifications, said repair or modification shall be approved in writing by the manufacturer or designer, and a copy of the approval shall be filed with the Township. The maintenance, repair, or modification maintenance must be completed within 30 days of discovery of the malfunction, or immediately upon discovery if the malfunction poses a threat to the public health or safety

f) The Township reserves the right to require additional devices if the facilities as designed do not function properly, to assure the appropriate quantity and quality of the stormwater leaving the storm water management facility meets the intent of the original design approved by the Township.

- 2) Prohibition of Alteration or Removal. The Owner shall not alter or remove any storm water management facilities depicted on the Plan unless prior written approval is obtained from the Township.
- 3) Township Inspection. The Owner hereby grants permission to the Township, its authorized agents and employees, to enter upon the property, at reasonable times and upon presentation of proper identification, to inspect the stormwater facilities whenever it deems necessary. Whenever possible, the Township shall notify the Owner a minimum of 72 hours prior to entering the property.
- 4) Failure to Maintain Facilities. In the event the Owner fails to operate and maintain the stormwater facilities as shown on the Plan in good working order acceptable to the Township, the Township or its representatives may enter upon the Property and take whatever action is deemed necessary to maintain said facilities. This provision shall not be construed to allow the Township to erect any permanent structure on the land of the Owner. It is expressly understood and agreed that the Township is under no obligation to maintain or repair said facilities, and in no event shall this Agreement be construed to impose any such obligation on the Township.
- 5) Township Maintenance Reimbursement. In the event the Township, pursuant to this Agreement, performs work of any nature, or expends any funds in performance of said work for labor, use of equipment, supplies, materials, and the like, the Owner shall reimburse the Township for all expenses (direct and indirect) incurred within 30 calendar days of receipt of invoice from the Township.
- 6) Liability. The intent and purpose of this Agreement is to ensure the proper maintenance of the onsite stormwater facilities by the Owner; provided, however, that this Agreement shall not be deemed to create or effect any additional liability of any party for damage alleged to result from or be caused by stormwater runoff.
- 7) Township Indemnification. The Owner, its executors, administrators, assigns, and other successors in interests, shall release the Township employees and designated representatives from all damages, accidents, casualties, occurrences or claims which might arise or be asserted against said employees and representatives from the construction, presence, existence, or maintenance of the stormwater facilities by the Owner or Township. In the event that a claim is asserted against the Township, its designated representatives or employees, the Township shall promptly notify the Owner and the Owner shall defend, at his own expense, any suit based on the claim. If any judgment or claims against the Township employees or designated representatives shall be allowed, the Owner shall pay all costs and expenses regarding said judgment or claim.
- 8) Default; Cure. In the event Owner fails to comply with the terms of this Maintenance Agreement, Township shall send written notice to Owner specifying the areas of noncompliance ("Deficiencies") and the steps that must be taken to comply. In the event Owner does not comply with the terms of the notice within 30 days of the date thereof, or diligently pursue compliance in

circumstances where compliance is not possible within 30 days due to weather conditions or otherwise, Township shall have the right, but not the obligation, to enforce this Maintenance Agreement at law or in equity, and/or to enter upon the Property and correct the Deficiencies, and collect the cost thereof from Owner by municipal lien against the Property or otherwise.

9) Use and Occupancy Permit. The requirements of this Maintenance Agreement are part of the conditions for issuance of the Township Use and Occupancy Permit for the development depicted on the Plan and the Property and it is the Owner's responsibility to comply with the requirements of this Maintenance Agreement. Should the Owner fail to comply, the Township reserves the right to revoke the Use and Occupancy Permit after providing the Deficiency notice and cure period as set forth in Paragraph 4 herein above.

10) Covenants Running With The Land; Successors and Assigns Bound. This Maintenance Agreement and the provisions hereof (1) shall run with the land, and be appurtenant to title to the Property and every portion thereof; and (2) shall be binding upon and inure to the benefit of the Owner, and each and all of its respective successors and assigns, and successors in title to the Property and every portion thereof. Any and all conveyances, leases or encumbrances of any part of the Property shall be subject to the provisions hereof.

11) Recording. This Agreement shall be recorded in the Office of the Recorder of Deeds of Chester County, Pennsylvania.

12) Notices. Any notice required to be given by the Township to Owner under the terms of this Maintenance Agreement shall be sufficiently given if sent by United States certified mail, return receipt requested, postage prepaid, addressed to the then owner of the Property and to the address as set forth in the records for the Property maintained by the Chester County Board of Assessment.

13) Miscellaneous Provisions.

- a) Severability. If any provision of this Maintenance Agreement shall to any extent be invalid or unenforceable, the remainder of this Maintenance Agreement (or the application of such provision to persons or circumstances other than those in respect of which it is invalid or unenforceable) shall not be affected thereby, and each provision of this Maintenance Agreement, unless specifically conditioned upon such invalid or unenforceable provision, shall be valid and enforceable to the fullest extent permitted by law.
- b) Amendment. This Maintenance Agreement may not be amended except by written instrument signed and acknowledged by the Owner, its successors and assigns, and Township and recorded in the Office of the Recorder of Deeds of Chester County, Pennsylvania.
- c) Governing Laws. This Maintenance Agreement shall be construed and governed by the laws of the Commonwealth of Pennsylvania.
- d) Integration. This Maintenance Agreement sets forth the entire agreement between the Owner and Township with respect to the subject matter hereof.

IN WITNESS WHEREOF, being duly authorized and empowered to do so, the Owner and Township have duly executed and delivered this Agreement as of the date and year first above written.

INSPECTION INSTRUCTIONS

General Notes:

- Please contact the building inspector with any questions at 610-436-5108.
- All **building** inspections must be scheduled through the **Township office (610-436-5108)**. On the day of your inspection, call the Township between 8:30-9:30 a.m. to confirm your inspection and to be given the scheduled time by the inspector (specific times are not assigned when initially scheduling). If you do not call between 8:30-9:30 a.m., the inspector will not come out.
- All **erosion and sediment (E&S)** inspections must be scheduled with **Melissa Needles (610) 436-5108 x107**. Most inspections require three working days notice (exceptions: footings, under slab plumbing, pool steel, sewer laterals, re-inspections). (Example: inspections requested Tuesday will be scheduled for Friday.)
- When scheduling an inspection, please have permit number, lot number and/or street address.
- If a message is left on voice mail, call back to verify the inspection was scheduled.
- Pursuant to §90-10D.(2), a scheduled building inspection will be postponed if the sedimentation erosion controls are not properly implemented or maintained.
- Provide an estimated time of completion.

Inspection Descriptions:

1. Initial Erosion & Sediment Control (E&S inspection) – After installation of the silt fencing, construction entrances, sediment traps, etc., applicant must contact Melissa Needles (610) 436-5108 x107 to schedule an inspection prior to proceeding with further construction.
2. Stormwater Facility (E&S inspection) – The stormwater facilities can be inspected anytime after the initial E&S inspection and before the final E&S inspection. The timing of this inspection depends on several factors, including weather, construction sequence, and type of facility. Please contact Melissa Needles (610) 436-5108 x107 for specific information.
3. Footings ready to pour (building inspection) (24 hours notice required) – This inspection is to be made after placement of sedimentation and erosion controls, excavation or forming for footings, and after placement of any reinforcement if specified but prior to placement of any concrete. Note: footings should have sharp corners, be of appropriate size and be continuous. When structures are close to setback lines, stakes shall be placed accurately, marking the lines that are close to construction.
4. Completion of masonry and foundation drains (“backfill”) (building inspection) (3 working days notice required) – This inspection is to be made upon completion of foundation wall, prior to setting of joints in a frame structure or upon completion of all walls, prior to setting ceiling joists and rafters in a masonry structure. All parging and waterproofing shall be complete and foundation drains will be inspected at this time. Sedimentation /erosion controls will be inspected for proper maintenance.
5. Completion of framing (“rough”) (building inspection) (3 working days notice required) – This inspection is to be made upon completion of all framing, prior to covering the inside of the structure. All elements to be concealed (i.e. plumbing, heating, electrical) should be complete at this time. An independent electrical underwriter’s rough wiring inspection sticker must be on the window prior to the inspection.* Do not begin drywall or insulation prior to this inspection. Sedimentation /erosion controls will be inspected for proper maintenance.
6. Wallboard inspection prior to spackle. (24 hours’ notice required)
7. Final E&S (E&S inspection) – After construction is complete and the site is stabilized, contact Melissa Needles (610) 436-5108x107 prior to removing erosion control devices for permission to remove them.
8. Final inspection and issuance of certificate of occupancy (building inspection) (3 working days notice required) – This inspection is to be made upon completion of the structure and all mechanical and utility systems. If the water supply is public, the meter must be set. The approved Sanitation Installation Certificate, the approved On-Site Water System Permit, and the Bacteriological Report must be returned with this inspection application. An independent electrical underwriter’s sticker for service, rough wire and final inspection sticker will be required along with an underwriter’s certificate.* Sedimentation /erosion controls will be inspected for proper maintenance.

Re-inspections: If re-inspections are necessary, they must be scheduled through the Township. Every effort will be made to re-inspect as soon as corrections are made.

***Electrical Inspections:** In accordance with the latest edition of the International Electrical Code, all construction activities require the following inspections be a recognized independent inspection agency: (1) electrical service (2) rough wire (3) final electrical (4) HVAC electrical connection (5) underground electrical. All approvals are subject to review by the Township. Municipal duplicate cards for each of the above inspection are to be forwarded to the Township upon approval.
